

Concorde®

innovative push-button technology

Eight-motor vibro-tactile massage stress reduction system

2406-18 - High Back Multi-Tilter with Pulsor in Black Leather (D534)

The Concorde executive is available with a built in relaxing system, called Pulsor. This stress reduction system offers four massage zones in the back and thigh areas. An individual zone can be activated or it can be set to alternate from zone to zone. Intensity can also be adjusted. The system helps alleviate back pain and muscle fatigue, reduces stress and improves circulation and productivity.

adjustable massage to suit any individual

Designed to fit people of all shapes and sizes

Concorde acknowledges a spectrum of body types and sizes - average and tall, medium and large, as well as all the subtle variations in between. Therefore, Concorde offers two back heights, adjustable lumbar positioning, sliding seat depth, adjustable clearance between armrests, and weight capacity up to 350 lbs. Concorde, will out preform your expectations, only from Global.

large or small adjustable fit and support

Back/lumbar height is adjustable by 3 inches. Back angle is lockable on 7 positions.

Each Arm Adjusts 1/4"

Sliding seat depth adjusts 16" to 18" (Models 2409, 2424, and 2425)

Stress Reduction System

Control Wand
A control wand with on/off control allows specific adjustment of the massage type, location and intensity.

Control Buttons
These turn the massage function on or off. LED lights in the chair arm indicate which massage motors are in use.

Power Source
Rechargeable battery slides into the built-in, under seat pocket (AC charger also included).

Concorde Technology

Tooling
Global invests heavily in high-precision tooling to maximize efficiencies, ensure rigid quality control and reduce product costs for its customers.

Manufacturing
Global's manufacturing divisions are closely linked and vertically integrated. Global is recognized for its earth-friendly environmental programs and processes.

Research + Development
Global's product designers and manufacturing engineers are supported by the most advanced computer-aided design equipment.

Engineering
Concorde 24-HR Chair has four utility patents related to button-controlled operation and several design registrations pending.

Concorde® 24-hr

Built for the most demanding of environments

In today's world, many workplaces must operate around the clock. Concorde 24-HR thrives in these intensely demanding environments. Concorde 24-HR accommodates multiple users with a weight capacity supporting up to 350 lbs. Seating positions adjust at the touch of a button according to each individual's needs for comfort and support. Most importantly, Concorde 24-HR is built to exceed ANSI/BIFMA standards and backed by Global's Limited Lifetime Warranty.

Weight capacity up to 350 lbs even when used in 24-HR applications

2424 - High Back Synchro-Tilter in Blue Fabric (Identity ID01)

The Multi-Shift Workplace

Utilities Control Room and Process Manufacturing Facilities deliver power non-stop; Concorde 24-HR delivers push button comfort for a lifetime-guaranteed by Global.

Health Care Institutions Concorde 24-HR works to keep caregivers comfortable, alert and ready for any emergency.

Finance, Insurance + Real Estate The twenty-four hour money market is never-ending action; Concorde 24-HR offers an instantly adjustable oasis of comfort.

Air Traffic Control + Transportation Monitoring Aircrafts arrive and depart, shifts follow each other around the clock, and Concorde 24-HR is there to meet the challenge.

Presidential performance

The 'Presidential' is the ultimate executive chair. Enhanced features include:

- Perforated leather inserts in seat and back
- Button controls in arms, conveniently located and in full view to make it easy for you to adjust your chair
- Taller ratchet back that adjusts to provide exceptional comfort and support
- Closed upholstered arms
- A more pronounced head rest and wider backrest
- Seat depth adjustment... seat slides in and out to match your leg length
- Polished aluminum base
- Decorative stitching details

Offered in Global's most luxurious leathers, Concorde provides the ultimate ergonomic support and comfort for the executive environment.

2409 - High Back Synchro-Tilter in Dark Brown Leather (D531)

The Executive 24-HR Series

The 'Executive' represents a new standard in executive seating. Revolutionary push button controls located on the durable armrest provide state-of-the-art ergonomic adjustment. Exceptional comfort and support are yours in Concorde Executive.

2425 - Low Back Synchro-Tilter in Black Leather (D534)

2424 - High Back Synchro-Tilter in Black Leather (D534)

comfort
at the push of a button

2409 - High Back Synchro-Tilter in Chestnut Leather (D540)

2409 - High Back Synchro-Tilter in Black Leather with optional black base (D534)

Concorde's patented Push Button technology is an industry 'first,' providing push-button control of your seating position from the arm of the chair. Push-button control – the standard in luxury automotive and aircraft seating – is now the new world standard in workplace seating. One of the features that makes this series unique is Concorde's arm-mounted push-button controls. With the click of a button Concorde floats free; press again and Concorde locks firmly in the desired position. Exceptional comfort, perfect support and a limited lifetime warranty are yours with Concorde.

Multi-tilter arm controls

Push Button/Ergonomic Controls

Tilt Lock Adjustment
The first button at the front of the left armrest releases the chair tilt into a free float position that follows the user's movement providing continuous support through a full range of motions. Pushing the button a second time instantly locks the free float into any five fixed positions.

Seat Height Adjustment
The button in the right armrest adjusts the seat height to accommodate the full spectrum of body sizes. This adjustment enables the user to maintain correct posture, minimizing pressure points, improving circulation and ensuring greater comfort for longer periods of time.

Back Angle Adjustment
The second button at the front of the left armrest releases the back angle into a free float position that follows the user's movement. Pushing the button a second time locks the chair back into a fixed position. (Models 2400-18 and 2406-18)

Sliding Seat Adjustment
Simply push the button and slide the seat in and out to match the length of your thighs. (Models 2409, 2424, and 2425)

Back Height Adjustment
The concealed back height adjustment lifts easily into one of six preset positions to provide superior lumbar support and maintain the natural 'S' curve of the back.
