**Receiving Procedures**

Every Morse drum handler is inspected prior to shipping. However, damage may be incurred during transit.

- Check for visible damage. If you choose to accept damaged freight, always sign noting the damage on the **Bill of Lading**.
- Document the damage and have the truck driver sign. We recommend keeping a digital camera at your receiving dock for this purpose.
- Open packages expeditiously to check the condition of the goods. There is only a 24 hour window to notify the carrier of any concealed damage.
- Immediately **report all damage to the shipping company!** Then you may contact Morse for assistance with your freight claim.
- Morse Manufacturing will not be held responsible for any damaged freight that is not signed for as damaged.

**Limited 2 Year Warranty**

Morse drum handling equipment is guaranteed against defects in workmanship or materials for two years when used properly within its rated capacity. Warranty does not cover wear from normal use or damage from accident or abuse. Motors and other purchased parts carry the warranties of their manufacturers.

For warranty claims, contact your Morse Dealer to obtain a return authorization number, and for return freight advice. Return freight must be prepaid.

In all instances, liability is limited to the purchase price paid or to repairing or replacing the product. Customer assumes liability for any modifications, unauthorized repairs or parts substitution.

**Safety Information**

While Morse Manufacturing Co. drum handling equipment is engineered for safety and efficiency, a high degree of responsibility must be placed upon the machine operator to follow safe practices, based primarily on common sense, upon which true safety depends.

Failure to follow the safety precautions in this manual can result in personal injury or property damage. Observe the same precautions as with similar machinery where carelessness in operating or maintenance is hazardous to personnel. Carefully read the safety precautions below and throughout this manual.

Review the Material Safety Data Sheet(s) for the material(s) in the drum(s) and take all necessary precautions. Safety shoes, work gloves, hard hat and other personal protective devices are recommended.

Prior to initial use, inspect all moving parts. Perform necessary load test, inspections, operator training, etc.

#### Safety Information (continued)

**DANGER** - Indicates a situation which, if not avoided, will result in serious injury or death. This signal word is limited to the most extreme situations.

**WARNING** - Indicates a situation which, if not avoided, could result in serious injury or death.

**CAUTION** - Indicates a situation which, if not avoided, can result in damage to the machine.

**WARNING** - Do Not Modify the Unit. Under no circumstances should any modifications be made to the Morse machinery without factory authorization. Any modifications may void the warranty. This machine was designed to perform a specific job and alterations may result in injury to operator or machine.

**WARNING** - No Loose Fitting Clothing Wear close-fitting clothing and safety equipment appropriate to the job. Loose fitting clothing may become caught on the machinery and cause severe personal injury.

**CAUTION** - Wear safety shoes with non-slip soles and hard toe protection.

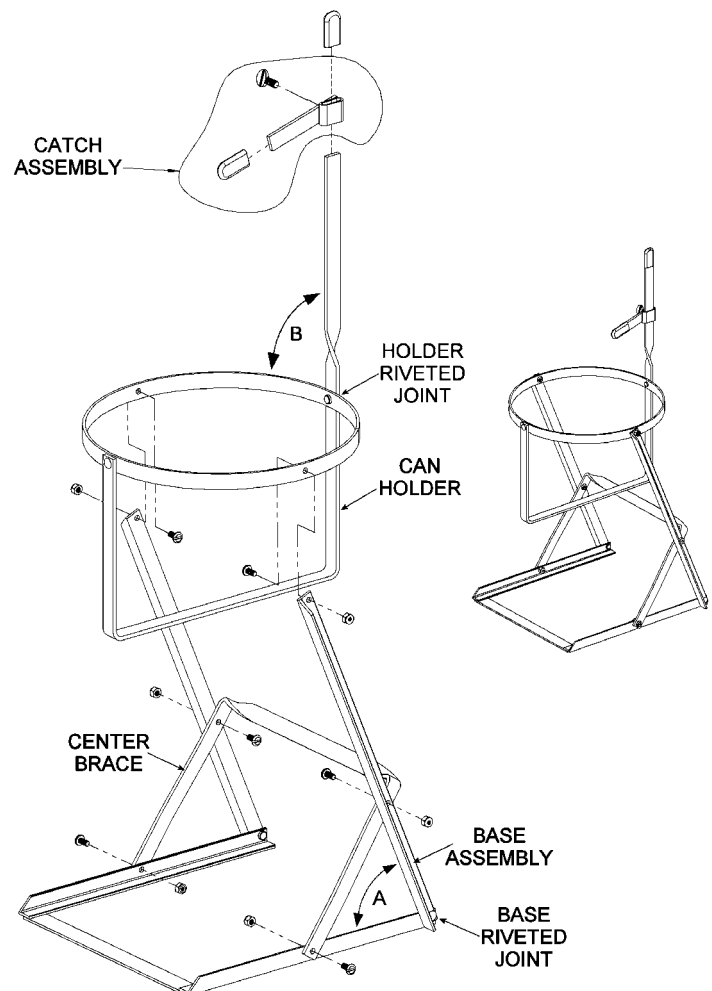

**CAUTION:** DO NOT exceed weight capacity of 75 Lb.

#### Assembly Instructions

- Unpack and identify the following parts:
  - 1 - Can Holder with Catch
  - 1 - Base Assembly
  - 1 - Center Brace
  - 6 - 1/4-20 x 5/8 Panhead Screws
  - 6 - 1/4-20 Two Way Lock Nuts
- Spread the base assembly open, hinging at the base riveted joints (see curved arrow A in parts diagram).
- Fasten the center brace in place using four screws and nuts as shown. Tighten securely.
- Rotate the can holder ring to horizontal position, hinging at the holder riveted joint, with the catch upright as shown (see curved arrow B in parts diagram).
- Place the can holder between the uprights of the base as shown. Insert screws (from inside of ring) through holes in the can holder ring and through the base uprights. Thread the nuts onto the bolts but do not tighten completely. The nuts should be just loose enough to allow the can holder to pivot freely.
- Place a few drops of oil on the pivot bolts before using and reapply oil periodically to minimize wear.

#### Maintenance

- Periodically inspect all moving parts, framework, and contact areas for signs of wear, fatigue, or loosening.
