

PomPoms on Rope #APMPM-R - 30 on 50' rope

Once a waterborne oil spill is contained; it's time for sorbent PomPoms.

- PomPoms float on the water's surface to absorb oily spills and even surface sheen. Thousands of thin strands of polypropylene are joined together to create this high surface area sorbent. Heavy oils adhere to the PomPoms, while water is repelled, so they won't become weighed down and capacity won't be wasted. This means you can leave them in place longer for maximum effectiveness. PomPoms come connected on a rope for instant deployment. Note: Actual color may vary.
