

# SAFETY DATA SHEET

## 1. Identification

| 1. Idontinoution                |  |   |  |
|---------------------------------|--|---|--|
| Product identifier              | CPVC Cement (Yellow)   |   |  |
| Other means of identification   |  |   |  |
| Product code                    | N/A  |   |  |
| Synonyms                        | Part Numbers: 20-315,325,330   |   |  |
| Recommended use                 | Joining CPVC Pipes   |   |  |
| Recommended restrictions        | None known.  |   |  |
| Manufacturer/Importer/Supplier/ | Distributor information  |   |  |
| Company Name                    | Comstar International Inc.   |   |  |
| Address                         | 20-45 128th Street   |   |  |
|                                 | College Point, NY 11356  |   |  |
| Telephone                       | 718-445-7900   |   |  |
| E-mail                          | customerservice@comstarproducts.com  |   |  |
| Transport Emergency             | 800-328-0142   |   |  |
| Emergency First Aid             | 718-445-7900   |   |  |
| Contact person                  | SDS Coordinator  |   |  |
| 2. Hazard(s) identification     |  |   |  |
| Physical hazards                | Flammable liquids  | Category 2                              |  |
| Health hazards                  | Acute toxicity, oral   | Category 4                              |  |
|                                 | Skin corrosion/irritation  | Category 2                              |  |
|                                 | Serious eye damage/eye irritation  | Category 2A                             |  |
|                                 | Specific target organ toxicity, single exposure  | Category 3 respiratory tract irritation |  |
|                                 | Specific target organ toxicity, single exposure  |   |  |
|                                 | Aspiration hazard  | Category 1                              |  |
| OSHA defined hazards            | Not classified.  |   |  |
| Label elements                  |  |   |  |
|                                 |  |   |  |
| Signal word                     | Danger   |   |  |
| Hazard statement                | Highly flammable liquid and vapor. Harmful if swallowed. May be fatal if swallowed and enters airways. Causes skin irritation. Causes serious eye irritation. May cause respiratory irritation. May cause drowsiness or dizziness. |   |  |
| Procautionary statement         |  |   |  |

Precautionary statement Prevention

Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/lighting equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Avoid breathing mist or vapor. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Use only outdoors or in a well-ventilated area. Wear protective gloves/protective clothing/eye protection/face protection.

| Response                                     | If swallowed: Immediately call a poison center/doctor. If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Call a poison center/doctor if you feel unwell. Rinse mouth. Do NOT induce vomiting. If skin irritation occurs: Get medical advice/attention. If eye irritation persists: Get medical advice/attention. Take off contaminated clothing and wash before reuse. In case of fire: Use appropriate media to extinguish. |
|--|--|
| Storage                                      | Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up.   |
| Disposal                                     | Dispose of contents/container in accordance with local/regional/national/international regulations.  |
| Hazard(s) not otherwise<br>classified (HNOC) | Frequent or prolonged contact may defat and dry the skin, leading to discomfort and dermatitis.<br>May form explosive peroxides. Contains a chemical classified by the US EPA as a suspected<br>possible carcinogen.   |

### Supplemental information

Not applicable.

### 3. Composition/information on ingredients

#### **Mixtures**

\_

| Chemical name                             | CAS number  | %     |
|---|-------------|-------|
| Furan, Tetrahydro-                        | 109-99-9    | 30-60 |
| Methyl ethyl ketone                       | 78-93-3     | 10-30 |
| Ethene, chloro-, homopolymer, chlorinated | 68648-82-8  | 10-20 |
| Acetone                                   | 67-64-1     | 5-15  |
| Cyclohexanone                             | 108-94-1    | 5-15  |
| Silica, amorphous, fumed                  | 112945-52-5 | 1-5   |

\*Designates that a specific chemical identity and/or percentage of composition has been withheld as a trade secret.

### 4. First-aid measures

| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.  |
|--|--|
| Skin contact   | Take off immediately all contaminated clothing. Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/attention.   |
| Eye contact  | Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.   |
| Ingestion  | Call a physician or poison control center immediately. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Aspiration may cause pulmonary edema and pneumonitis.   |
| Most important<br>symptoms/effects, acute and<br>delayed                     | Irritation of nose and throat. Aspiration may cause pulmonary edema and pneumonitis. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Vapors have a narcotic effect and may cause headache, fatigue, dizziness and nausea. Skin irritation. May cause redness and pain.             |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and treat symptomatically. Thermal burns: Flush with water immediately. While flushing, remove clothes which do not adhere to affected area. Call an ambulance. Continue flushing during transport to hospital. In case of shortness of breath, give oxygen. Keep victim warm. Keep victim under observation. Symptoms may be delayed. |
| General information  | Take off all contaminated clothing immediately. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.  |
| 5. Fire-fighting measures  |  |
| Suitable extinguishing media   | Alcohol resistant foam. Water fog. Dry chemical powder. Carbon dioxide (CO2).  |
| Unsuitable extinguishing   | Do not use water jet as an extinguisher, as this will spread the fire.   |

Specific hazards arising from Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters

media

the chemical

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

| Fire fighting<br>equipment/instructions                                   | In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.  |
|---|---|
| Specific methods  | Use standard firefighting procedures and consider the hazards of other involved materials.  |
| General fire hazards  | Highly flammable liquid and vapor. This product contains tetrahydrofuran that may form explosive organic peroxide when exposed to air or light or with age.   |
| 6. Accidental release mea   | sures   |
| Personal precautions,<br>protective equipment and<br>emergency procedures | Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.   |
| Methods and materials for containment and cleaning up                     | Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Take precautionary measures against static discharge. Use only non-sparking tools. Keep combustibles (wood, paper, oil, etc.) away from spilled material. This product is miscible in water.  |
|   | Large Spills: Stop the flow of material, if this is without risk. Use water spray to reduce vapors or divert vapor cloud drift. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Use a non-combustible material like vermiculite, sand or earth to soak up the product and place into a container for later disposal. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water.   |
|   | Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.   |
|   | Never return spills to original containers for re-use. For waste disposal, see section 13 of the SDS.   |
| Environmental precautions   | Avoid discharge into drains, water courses or onto the ground.  |
| 7. Handling and storage   |   |
| Precautions for safe handling   | Vapors may form explosive mixtures with air. Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Explosion-proof general and local exhaust ventilation. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Avoid breathing mist or vapor. Avoid contact with eyes, skin, and clothing. Avoid prolonged exposure. Do not taste or swallow. When using, do not eat, drink or smoke. Wear appropriate personal protective equipment. Wash hands thoroughly after handling. Observe good industrial hygiene practices. |
| Conditions for safe storage,<br>including any incompatibilities           | Store locked up. Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in original tightly closed container. Store in a well-ventilated place. Store away from incompatible materials (see Section 10 of the SDS).   |

# 8. Exposure controls/personal protection

### **Occupational exposure limits**

## US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

| Components                                    | Туре    | Value      |  |
|---|---------|------------|--|
| Acetone (CAS 67-64-1)                         | PEL     | 2400 mg/m3 |  |
|   |         | 1000 ppm   |  |
| Cyclohexanone (CAS<br>108-94-1)               | PEL     | 200 mg/m3  |  |
| ,   |         | 50 ppm     |  |
| Furan, Tetrahydro- (CAS<br>109-99-9)          | PEL     | 590 mg/m3  |  |
|   |         | 200 ppm    |  |
| Methyl ethyl ketone (CAS 78-93-3)             | PEL     | 590 mg/m3  |  |
| ,   |         | 200 ppm    |  |
| US. OSHA Table Z-3 (29 CFR 191                | 0.1000) |            |  |
| Components                                    | Туре    | Value      |  |
| Silica, amorphous, fumed<br>(CAS 112945-52-5) | TWA     | 0.8 mg/m3  |  |

### US. OSHA Table Z-3 (29 CFR 1910.1000)

### Exposure guidelines

### US - California OELs: Skin designation

Cyclohexanone (CAS 108-94-1)

US - Minnesota Haz Subs: Skin designation applies Cyclohexanone (CAS 108-94-1) Can be absorbed through the skin.

Skin designation applies.

| US - Tennessee OELs: Skin   | designation   |  |
|---|---|--|
|   |   | Can be absorbed through the skin.  |
| US ACGIH Threshold Limit  | Values: Skin designation  |  |
| Cyclohexanone (CAS 108  |   | Can be absorbed through the skin.  |
| Furan, Tetrahydro- (CAS   |   | Can be absorbed through the skin.  |
| US. NIOSH: Pocket Guide to  | o Chemical Hazards  |  |
| Cyclohexanone (CAS 108  | 8-94-1)   | Can be absorbed through the skin.  |
| Appropriate engineering<br>controls                                   | Explosion-proof general and local exhaust ventilation. Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eye wash facilities and emergency shower must be available when handling this product. |  |
| Individual protection measures, such as personal protective equipment |   |  |
| Eye/face protection   | Face shield is recommended.   | Wear safety glasses with side shields (or goggles).  |
| Skin protection   |   |  |
| Hand protection   | Wear appropriate chemical re  | sistant gloves.  |
| Other   | Wear appropriate chemical re  | sistant clothing.  |
| Respiratory protection  | If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.   |  |
| Thermal hazards   | Wear appropriate thermal protective clothing, when necessary.   |  |
| General hygiene<br>considerations                                     | as washing after handling the   | or smoke. Always observe good personal hygiene measures, such material and before eating, drinking, and/or smoking. Routinely wash equipment to remove contaminants. |

# 9. Physical and chemical properties

| Appearance                                 |                              |

# 10. Stability and reactivity

| Reactivity                            | The product is stable and non-reactive under normal conditions of use, storage and transport.  |
|---------------------------------------|--|
| Chemical stability                    | Material is stable under normal conditions.  |
| Possibility of hazardous<br>reactions | No dangerous reaction known under conditions of normal use.  |
| Conditions to avoid                   | Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Contact with incompatible materials. |
| Incompatible materials                | Acids. Strong oxidizing agents. Ammonia. Amines. Isocyanates. Caustics.  |
| Hazardous decomposition<br>products   | No hazardous decomposition products are known.   |

# 11. Toxicological information

### Information on likely routes of exposure

| Inhalation   | May be fatal if swallowed and enters airways. Headache. Nausea, vomiting. May cause irritation to the respiratory system. Vapors have a narcotic effect and may cause headache, fatigue, dizziness and nausea. Prolonged inhalation may be harmful.  |
|--|--|
| Skin contact   | Causes skin irritation.  |
| Eye contact  | Causes serious eye irritation.   |
| Ingestion  | May be fatal if swallowed and enters airways. Harmful if swallowed. Harmful if swallowed. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.   |
| Symptoms related to the physical, chemical and toxicological characteristics | Irritation of nose and throat. Aspiration may cause pulmonary edema and pneumonitis. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. |

### Information on toxicological effects

| Acute toxicity                       | May be fatal if swallowed and enters airwa     | ays. Narcotic effects. May cause respiratory irritation. |

|--|---|--|--|--|
| Respiratory sensitization  | Not available.  |  |  |  |
| Skin sensitization   | •   | This product is not expected to cause skin sensitization.                                  |  |  |
| Germ cell mutagenicity   | No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.  |  |  |  |
| Carcinogenicity  | In 2012 USEPA Integrated Risk Information System (IRIS) reviewed a two species inhalation lifetime study on THF conducted by NTP (1998). Male rats developed renal tumors and female mice developed liver tumors while neither the female rats nor the male mice showed similar results. Because the carcinogenic mechanisms could not be identified clearly in either species for either tumor, the EPA determined that the male rat and female mouse findings are relevant to the assessment of carcinogenic potential in humans. Therefore, the IRIS review concludes that these data in aggregate indicate that there is "suggestive evidence of carcinogenic potential" following exposure to THF by all routes of exposure. |  |  |  |
