

TekStak™

Introducing the newest product in Datum's Computer Security line, the TekStak™.

This unit is designed for to store, secure, and even charge laptops and other electronic devices. Designed for one to one use, choose your number of tiers to create a tower that can be used wherever individual storage for many people is required.

- Optional electric gives the TekStak™ 2 outlets per tier, allowing for charging a laptop and other electronics, such as a cell phone, at the same time.
- Electric TekStaks™ can be stacked 5 or 10 units high while non-electric ones can be stacked 5 to 12 units high.
- Locking door keeps items secure. Key, hasp, or electronic lock options available.
- Ventilation pattern provides maximum air flow for cooling while still keeping even smaller items safely locked inside.
- Optional laminate top is available to create a convenient work surface.
- Optional drawer base for peripheral storage.
- Available in 19 standard colors to match any decor.

Key lock: each tier has a separate key. A master key can be provided to open all tiers.

Lock hasp: Allows users to use their own padlocks (not included).

Electronic code lock: Each tier locks with an unique code. Master codes can be provided for all locks.
