ASSEMBLY AND INSTALL

CONNECTION

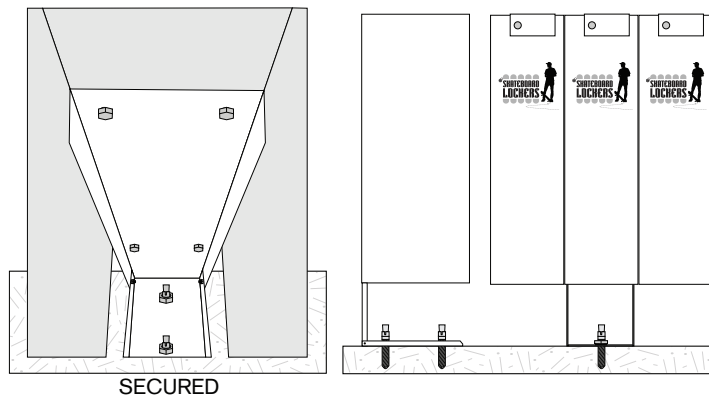

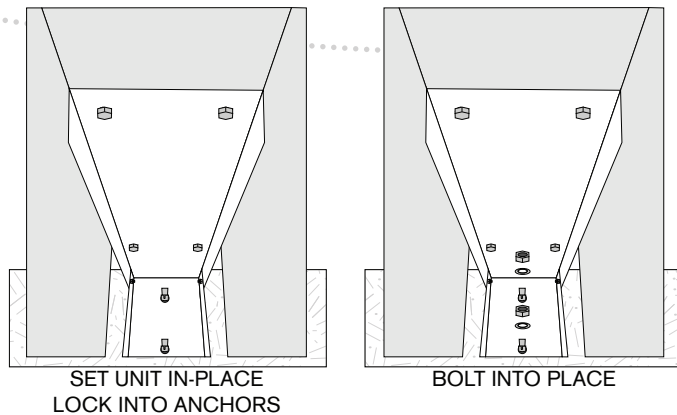

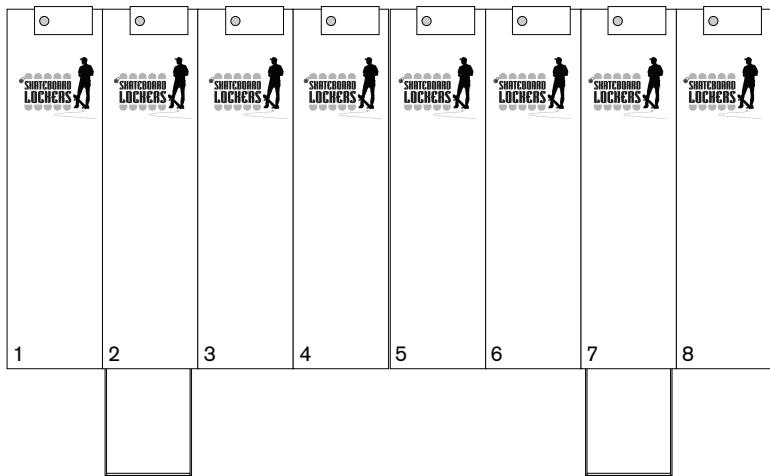

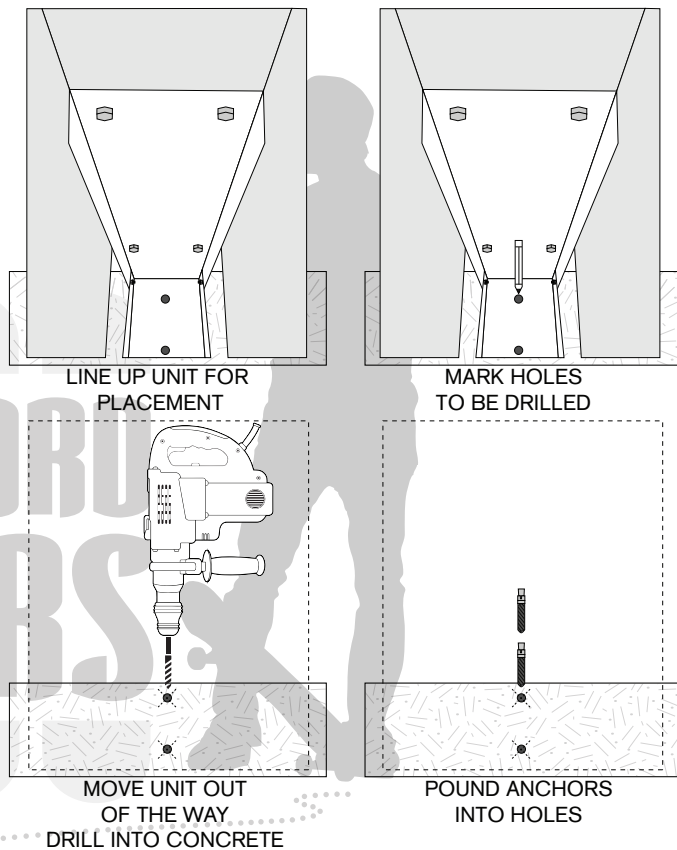

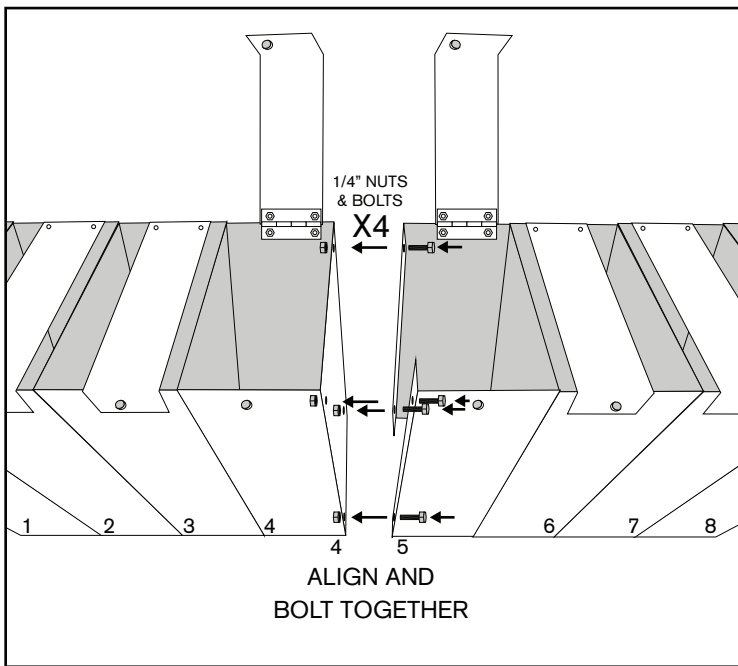

CONNECT LOCKER #4 and #5 (By position)

1. The bolt and nuts are connected to Locker #4 already to hold them in place temporarily, so nuts need to be unscrewed
2. Align lockers
3. Keep bolts in place
4. Tighten nuts and bolts together
5. Move unit to final location
6. Prepare to install

INSTALL

1. Place on the concrete and the holes need to be marked
2. Move the lockers bank aside
3. Drill holes with easy access.
4. Pound the Anchor bolts into holes (Use a sledge-hammer or slide hammer)
5. Leave about 1/4"-1/2" of thread showing above the nut.
6. Place lockers with Leg/feet back over the holes
7. Secure into place by bolting down anchors

INSIDE LOCKERS (2 AND 7)
