

Patient Connect Cart

741365

The Patient Connect Cart is designed for ergonomic displaying and viewing of information. It is perfect for telemedicine, electronic medical records documentation and patient entertainment. The universal tablet holder can secure virtually all types of tablets to the articulating arm. The 24" arm reach is ideal for viewing and operating a tablet in a chair or bed. The cart comes with both 100 mm / 75 mm VESA mounting plate and a universal tablet holder.

The VESA mounting plate can be used to secure all compatible monitors. The universal tablet holder is fabricated from heavy gauge steel to protect and secure the tablet. The tablet is mounted to the holder with two hold-down brackets. The brackets can be mounted with either set screws (for security purposes) or a knob for easy removal of the tablet. Both options are included with the purchase so it is up to the customer if they want the tablet locked in place (requires a hex wrench to remove) or easily removed. Please note that there are hundreds of tablets on the market and there are no standard dimensions. To help accommodate the various sizes and shapes – we have utilized two different slot configurations.

The articulating arm provided extends 24” from the cart. It has a 16” vertical range of motion. It can accommodate tablets and monitors up to 17 lbs. The monitor can pivot from landscape to portrait. The monitor pivot head tilts so the tablet can be viewed from different angles and can even be tilted 90 degrees so it can be used as a flat surface. This is ideal for writing and drawing on tablets.

- Maximum height to center of monitor – 54”
- 24” arm reach
- 16” vertical range of motion for arm
- Universal tablet holder and VESA mount provided
- Hold-downs for tablet come with easy to remove knobs and tool required set screws
- Mount can easily be rotated for landscape or profile viewing
- Head tilts to change the angle of viewing or to provide a writing surface
- Solid steel base 18” wide x 16” deep
- Counterweight base plate with mounting holes for optional cord reel
- Four 3” black hooded donut casters (2 locking)
- Solid steel column is 41” high and 1.5” diameter
- Column clamp for articulating arm can be adjusted to lower the overall height
- 10-Year Warranty (1-year for casters)
