

Model 45HEPA-Dry and 45HEPA-TT

2HP, 10 Gallon Recovery HEPA Vacuums

Equipped with a powerful 2-horsepower motor and an extra large capacity HEPA filter system, the model 45 offers the air flow efficiency of vacuums costing three times as much. Low noise allows for use in sound sensitive areas. The model 45 is manufactured to the same high standards as our larger HEPA vacuums, so it will withstand years of hard use. Available in wet/dry or dry only.

Powerful Vacuum:

A 2 horsepower, 2 stage by-pass, 11.1 amp motor delivers 105" waterlift and 110 CFM. Plenty of power for fast pick-up of wet and dry hazardous materials at an affordable price.

True 99.97% Type A Large Capacity HEPA Filter:

Individually tested and certified to have a minimum efficiency of 99.97% at .3 microns in accordance with IEST-RP-CC001 test requirements.

The model **45HEPA-TT** has a **"Tool Trigger"** feature allowing the operator to turn the vacuum on or off through the power tool. Stricter worker and environmental regulations are requiring tradesman who cut and grind concrete and masonry materials to control dust. Collecting and containing dust increases worker and power tool productivity, extends life of the abrasives and reduces clean-up time and expense.

45HEPA-Dry

45HEPA-TT

Features:

High efficiency 2-ply enclosed, disposable paper filter bag acts as the primary filter to trap and hold dry material for easy handling and disposal. (B700408)

Commercial grade, long-life 2HP motor - exceeds airflow and pick-up of vacuums purchased from home improvement stores.

Compact, low center of gravity design - No tipping, easy handling, transporting and storage

Tested and certified HEPA filter - Oversized HEPA filter with plenty of media to handle high airflow.

"Never Clog" Dacron filter bag - Self-cleaning, maximizes airflow and prevents interruptions when picking up large volumes of dry, fine dust.

Positive locking, full swivel hoses - No binding and flexible. Easy handling and storage.

50-foot power cord - Operates in a wide area without changing electric outlets.

HEPA Filter – Made from a single piece of high-grade HEPA media to eliminate the possibility of leaks. (B702340)

"Never Clog®" Filter Bag – Sheds dirt and debris like a duck sheds water. Shakes clean to maintain maximum airflow. (B000517)

Each Pullman-Holt HEPA filter is tested and certified to provide a minimum efficiency of 99.97% at .3 microns based on IEST-RP-CC001 test requirements.

PULLMAN-HOLT Part No. B702340
 P512306 Mfrd by Donaldson Company, Inc.
 IEST-RP-CC001, Type A, Grade 6, 105 cfm
 This HEPA filter has been tested and is certified to have a minimum efficiency of 99.97% on .3 micron.
