

## Foamy, cushioned Bumper Guards prevent injuries and reduce impact

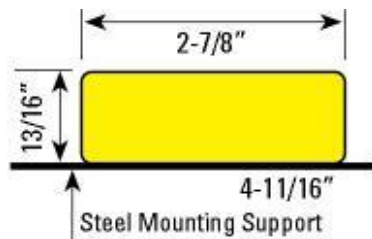

Foamy bumpers come in 11 different shapes for a multitude of uses. These bright daytime-visible black-yellow bumpers are made of recyclable polyurethane foam and help prevent employees from getting injured by bumping into protruding corners, obstacles, sharp edges and other harmful objects. The bumpers also help prevent damages to expensive equipment, interior walls and cars in parking garages. Several shapes are also available as Photoluminescent Glow-in-the-Dark bumpers, or as Daylight Fluorescent/Darkness Photoluminescent bumpers. Black 2D and 3D corner end pieces complete this safety product line.

Installation is easy: simply remove the protective silicone liner and press-apply the sturdy 39-3/8" long adhesive-backed bumpers to I-beam shelves, metal, walls, wood, equipment and other clean surfaces.

## Type S1 St.

### Flat Surface Protection with Stainless Steel Support

<p><b>Color Options:</b></p> <p>Item-No.: 82-0437</p>	 <p>Black-Yellow Suited for OUTDOOR USE Yellow Foam Body.</p>
---	--

#### Technical Data:

Material:	Polyurethane Foam, recyclable, CFC-free. Suited from -35° Celsius = -31° Fahrenheit to 80° Celsius = 176° Fahrenheit in normal dry conditions.
Foam Size:	2" wide x 13/16" thick x 39-3/8" length
<u>Surface</u> of Black-Yellow Bumper:	solid foamed PU-Film, colored by counter pressure, hence no external color layer. Suited for Outdoor Use!
Mounting:	Stainless Steel Support securely attached to foam bumper. Steel support has six holes. (No adhesive backing)
