MATERIAL HANDLING

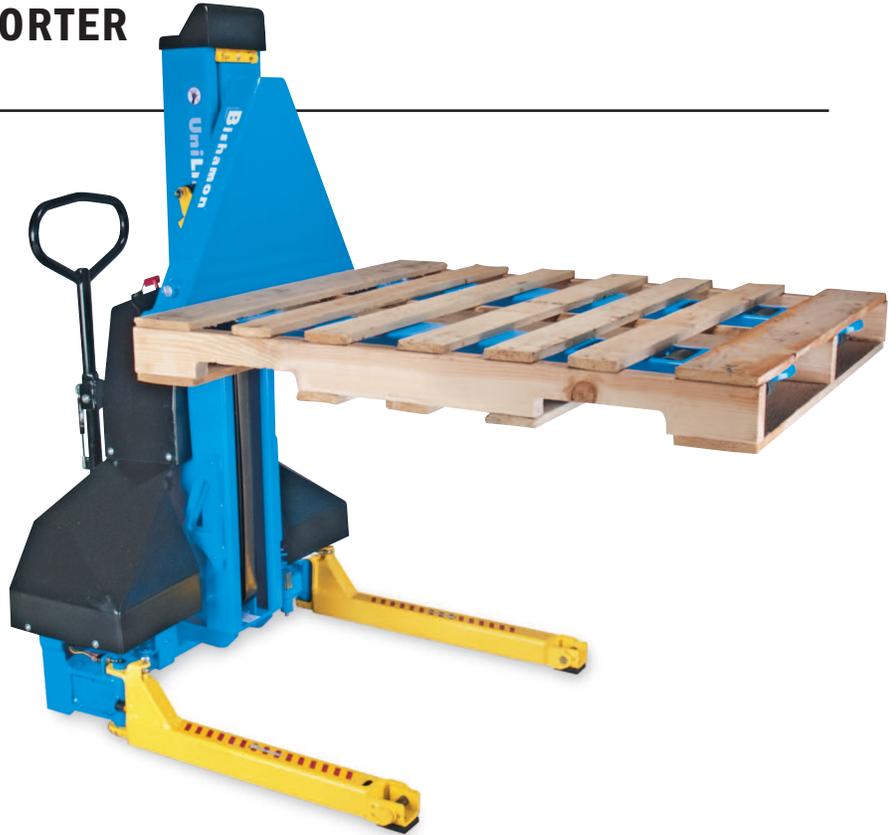

- Overall Fork WxL: 27x46"
- Lift Height: 3-34"

SKU: 251986

> DIRECT SHIP

DESCRIPTION:

BISHAMON UniLift Pallet Transporter and Positioner handles and steers like a manual pallet jack, lifts like a powered stacker. Outriggers fold into frame allowing you to move and lift a closed bottom pallet without straddling it—simply push a button to unfold or fold outriggers. Position sensors on the outriggers will not allow lifting until outriggers are fully deployed. 1700-lb. capacity at 24" load center; 2000-lb. capacity at 20" load center. Lift is powered by a 24-volt DC rechargeable battery. Control panel includes raise and lower buttons, dual function key/battery disconnect switch, outrigger position LEDs and battery status LEDs. Maneuvers on 8" polyurethane steer wheels and 3" polyurethane load rollers. Standard outrigger legs include footpads, or add optional load rollers. Tough powder coat finish. Please note: the UniLift is not designed to transport elevated loads.
