

# • SAFCO PRODUCTS – WHO ARE WE?

Safco has taken a wrench and thrown it into the conventional idea of an office environment. Our product solutions are built for every environment, to help you get your work done and make your workday easier. We know different environments have different needs, and that each space may do the same job differently, making multiple solutions and product options a necessity. That's why Safco has a large product offering. We make it possible for each work environment to get what it needs to move the workday along, no matter which road you take to get there.

Safco's extensive product solutions are just as hardworking as your environment, giving you heavy-duty and durable solutions that will stand up to harsh environments, but can also cleanup nicely. Our seating, storage, facility and healthy workspace solutions are just the beginning of what Safco can do for your office environment. Safco will help you work smarter, with solutions built for how you work.

## • OUR MISSION
