## Light-Duty Absorbent Pillows/Drip Pans

**Made in the USA**

- Absorbent Pillows are an economical choice for soaking up leaks and drips around machinery and other MRO (maintenance, repair and operations) applications
- For steady, localized leaks and drips place a sorbent pillow inside of the drip pan to keep liquids from getting to the floor and allowing for easier disposal

- Made with recycled cellulose fibers and are great for absorbing both oil and water, as well as grease, transmission fluid, hydraulic fluid, coolants and many other types of liquids
- Each case contains 20 absorbent pillows and 10 drip pans

*Caution: Not for use with aggressive acids or caustics. Dispose of all sorbent material in accordance with local, state and federal regulations.*

## General Purpose Absorbents

EverSoak® is a truly innovative green sorbent product with a general purpose line that is made with 70% recycled fibers. EverSoak® is up to twice as absorbent as the leading competitors' meltblown sorbents, according to independent lab tests, which helps reduce usage.

Sellars uses recycled cellulose fibers to produce the General Purpose EverSoak® products. Unlike any other sorbent manufacturer, Sellars is also a manufacturer of a full line of very popular DRC shop towels. This gives us a strategic advantage because we are able to use the waste from producing our high quality industrial wipers as the major raw material source for our general purpose EverSoak® products. Since the major source of raw material is generated internally, we are not forced to purchase random and inconsistent waste material on the open market for our general purpose sorbent products.

 **Made in the U.S.A.**
