CL·ED AUDIO ALARM KIT

The alarm kit has an internal horn that will sound once the push bar has been depressed, thus signalling the door has been opened. The alarm is powered by a 9 volt battery. The device incoporates a keyway mortise cylinder to operate the shut off switch.

DOUBLE DOOR APPLICATION

If double doors are being fitted with CL·ED Rim devices, then a removable central mullion is required.

33" (840mm), 2³/₄" (70mm), 8¹/₁₆" (205mm), 24¹³/₃₂" (620mm), 2⁷/₈" (73mm), 33" (840mm)

*Codelocks and KitLocks electronic locks offer a two year warranty and will be repaired, serviced or replaced free of charge if they develop a manufacturing fault. Faults caused by misuse, abuse and/or poor fitting are not covered by the warranty.
