

Compact Dual Flow 5-Chemical Dispenser

The Global Industrial™ Compact Dual Flow 5-Chemical Dispenser is a precision proportioner that connects to a water supply and dilutes up to 5 concentrated chemicals from any size container to a pre-determined ratio into a ready-to-use solution. A one gallon per minute plus four gallon per minute flow rate in the same unit, makes filling spray bottles, small containers, as well as mop buckets and floor machines quick and easy.

DIRECTIONS

Please refer to user's manual for proper installation, operation and servicing of these products.

Please observe local water regulations regarding backflow prevention. Wear protective clothing, gloves and goggles when installing dispensers or handling chemicals.
