

How far off the ground must a fan be?

Not only do we not recommend hanging your fan low enough to serve as a walk through barber shop – the fine peeps at OSHA require that a fan be a minimum of ten feet above the floor. You’ll want to factor in three feet for our standard drop mount when making the appropriate calculations.

How do I buy a Hunter Industrial Fan?

How kind of you to ask! Your Hunter Industrial Regional Sales expert would be delighted to assist you. If you haven't yet had the pleasure of meeting them, we'd be pleased to introduce you. Simply give us a ring at [1-844-592-FANS \(3267\)](tel:1-844-592-FANS).

[Back to Top](#)

How soon can I expect my fans to arrive once ordered?

We are thrilled by your enthusiasm and assure you that most orders will arrive within 7-10 business days.

[Back to Top](#)

What makes a Hunter Industrial Fan different than the competition and how does this difference benefit me?

When we say our fans are lighter, more efficient and easier to maintain than the other guys, we're not blowing hot air! With Hunter Industrial fans your Total Cost of Ownership will be lower because they cost less to install, save you more money when running and save you time and expense overall by working properly for years to come. Need we say more?

What is LEED and how will Hunter Fan aid me in LEED certification?

Hunter Industrial fans are not only designed to save you green - they're inherently built to be green. The US Green Building Council created the LEED program to create benchmarks and to serve as a third-party verification program to promote and recognize good environmental stewardship for resources and sensitivity to the impacts of energy savings, water conservation, CO2 emission reductions and improved indoor environmental quality. In short, Hunter Industrial fans can play a significant role in establishing business owners and operators as environmentally aware and responsible members of their communities.

[Back to Top](#)

How much muscle and time are required to install these fans?

While other fans require two people and four to six hours or more to install, we've designed our fans to be light enough for one person to lift and intuitive enough to shave significant time off of the norm. That said, a party is always more fun with two people and our faster install times will be exponentially improved by two pairs of hands.

[Back to Top](#)

What if I have more pressing matters to attend to than installing these magnificent fans?

Have no fear! We're happy to do the tedious work for you – though we've redesigned the industrial fan to be much less tedious to install than other brands. Just give us a ring and we'll share all of the fascinating details of our installation program.

[Back to Top](#)

How painful will the shipping charges be for one of these circulating beasts?

Not nearly as painful as most industrial fans. We've deliberately designed ours with fewer parts and to be much lighter than the common industrial fan. You should plan on roughly \$250 per fan as a rule, but we'll always strive to deliver yours as quickly and painlessly as possible.

What is the standard warranty of a Hunter Industrial Fan and what is the Warranty Process?

As you may know, Hunter has earned quite the reputation for building fans that often outlast the rooms they're installed in so naturally our warranty reflects this. When our fine Factory Authorized Installers mount your fan you'll be covered a full 15 years. Do be sure to call our Service number to initiate your warranty at [1-844-593-FANS \(3267\)](tel:1-844-593-FANS).
