Mounting surface
not included

Use a 3/8" drill bit
to make mounting holes

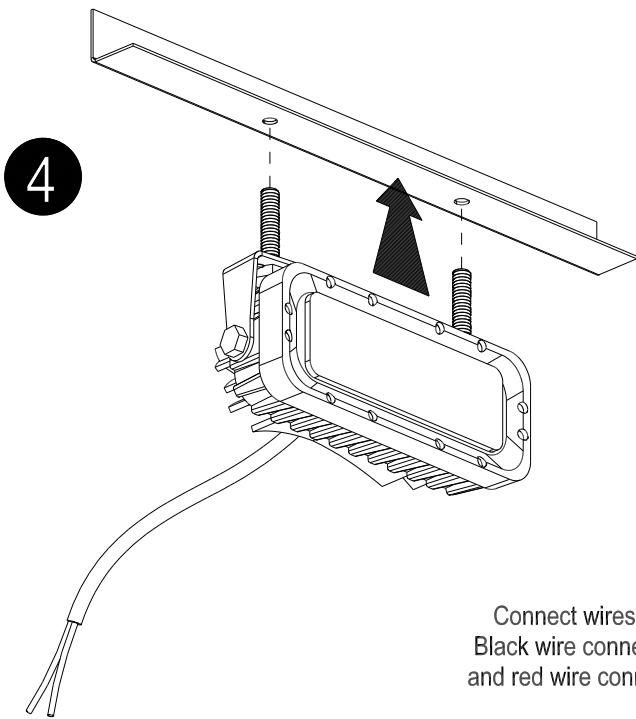

Note: Drill bit not included

4.5 IN.

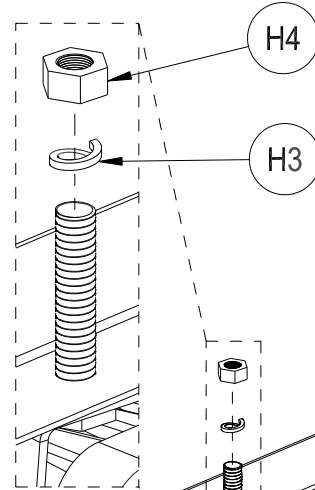

WARNING.

- To properly install this work light, you must have a good understanding of automotive electrical procedures and systems, along with proficiency in the installation and use of safety warning equipment
- When drilling into a vehicle structure, be sure that both sides of the surface are clear of anything that could be damaged
- You should frequently inspect the light to ensure that it is operating properly
- This product contains high intensity LED devices. To prevent eye damage, DO NOT stare into the light beam at close range
- Ideal location for the LED is the top horizontal safety cage beam (front and/or rear as applicable)

If these instructions are not clear, contact your local fork lift dealer for correct electrical connection locations for your particular vehicle. Also, note the length of the wire required for final installation varies by application and location. An extension wire can be used if needed.

5

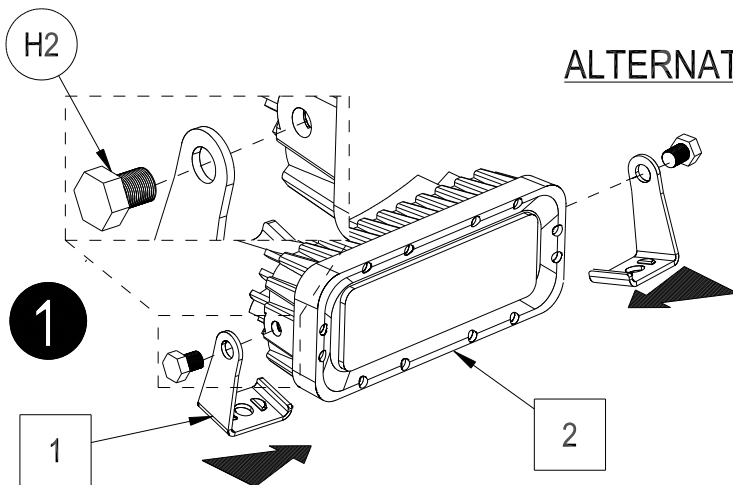

Red Wire: Positive

Connect wires to vehicle battery.
Black wire connects to negative pole
and red wire connects to positive pole
