

BloodSTOP®

CONTROLS BLEEDING FAST

**Oxidized Etherized Regenerated Cellulose
Water Soluble Hemostat**

BloodSTOP® is a natural, biocompatible, non-irritating, animal-free hemostatic agent which resembles traditional gauze. Using a proprietary formulation, cotton cellulose is oxidized and etherized to make a highly absorbent, water-soluble, hemostatic matrix. Its composition provides certain advantages for natural rapid hemostasis as well as patient comfort and improved wound management when compared with traditional adhesive bandages, sprays, chemical powder, or animal-based products. BloodSTOP is the European Union CE class II certification and FDA 510k market cleared for surface wound hemostasis.

How it Works

When applied to a wound, BloodSTOP quickly absorbs blood and other body fluids, transforms into a gel to seal the wound with a protective transparent layer, actively aids in blood coagulation, and creates an environment for wound healing.

- Easy to use
- Acts in less than a minute
- No animal-derived material
- Active bleeding control over traditional gauzes
- Painless upon application and removal
- Water soluble for easy removal without disruption to wound surface
- Adheres to the wound without the discomfort of adhesives
- Easy to cut, pack or layer to fit the wound
- Safe for all age groups
- Single use sterile packaging, several sizes
- Biodegradable

| Product Description | Qty per box | Product Code |
|--------------------------------------|-------------|--------------|
| BloodSTOP hemostat 1"x1" (2.5x2.5cm) | 20/box | BS-09 |
| BloodSTOP hemostat 2"x2" (5x5cm) | 20/box | BS-10 |
| BloodSTOP hemostat 2"x4" (5x10cm) | 20/box | BS-11 |
| BloodSTOP hemostat 4"x4" (10x10cm) | 10/box | BS-12 |
| BloodSTOP hemostat 4"x8" (10x20cm) | 10/box | BS-13 |
| BloodSTOP hemostat mini-pads 2x2cm | 80/box 4/pk | BS-MP-18 |
