

Vertical Storage Cart

"LOW LIFT" CART FOR EASY LOADING

The Vertical Post Storage Cart has an 18 post capacity and is designed for effortless loading, movement and storage of stanchions. The "low lift" design means stanchions only have to be lifted 13"/330mm to be loaded. 2"/50mm, 2.5"/64mm or 3"/76mm diameter posts can all be accommodated on this cart due to its vertical "standing post" storage design. A width of 32"/813mm and loaded height of just 51"/1295mm allows the Vertical Storage Cart to fit through standard doorways.

Low lift loading

Low height - fits through standard doorways
