

SERIES 10 HAND GRINDER MODEL 8571-210

The Series 10 is the industries most popular hand grinder for precision tool and die work and all-around use. It's extremely accurate and provides exceptional ease of control with less operator fatigue. The Series 10 is capable of rotary filing, de-burring, cleaning and polishing. The advanced design Dumore motor is more efficient, conserves power and runs cooler. The unit contains two grease lubricated ball bearings. The precision ground chucks provide for fast change-over and minimizes run-out. The back mounted on/off switch provides additional operator safety.
