Ordering Information:

JE-9136Z 36" length from waist

JE-9139Z 39" length from waist

UL Certified
Meets ASTM Std. F-1897-2008.

Key Product Features

- New improved zipper and velcro leg and thigh closures make the ProChapsZ™ easy to put on, adjust for comfort and take off while eliminating straps and loose catch points making the chaps safer to wear while climbing or working around chippers and other moving equipment.
- Features Prolar™ padding which effectively jams chain to quickly stop cutting action. Tested and certified by Underwriter Laboratories in accordance with ASTM F-1414 and meets ASTM Standard F-1897-2008 that requires an upgraded level of protection to chain speed of 2,750 feet per minute.
- Smart asymmetrical design (U.S. Patent No. 5,095,544), extended protection on left side of legs, where most injuries occur.
- Full wrap-around calf protection helps protect legs from sharp branches, thorns and heavy brush.
- Apron design constructed from heavy-duty 1,000 denier, water and oil resistant. Cordura® nylon outer fabric for extra durability and longer wear in thorny and abrasive conditions.
- ProChapsZ™ are lightweight and breathable with open back design which prevents heat build-up to keep workers comfortable in hot conditions.
- New 6 in. x 12 in. x 2 in. deep 'productivity pocket' and sleeve for a chain saw 'wrench' has been added to hold wedges or other tools.
- Available lengths: 36 inches and 39 inches measured from the waist.
- Self-storing, adjustable 2 inch wide waist belt to eliminate that loose end catch point for added safety. Maximum waist size of 50 inches.

Self-Storing Waist Belt.
Eliminates loose end.

Replaceable Velcro Thigh Closures.
Available in two sizes: Standard 12" JE-LEGZ12 and Large 16" JE-LEGZ16.

Self-Storing Feature-Fold down chaps to fit into one leg and zip closed. Easy to store and carry.

APPLICATIONS: for workers using chain saws, chippers and power equipment – clearing roadways, removing debris, trimming, logging, farming, utilities, public works and vegetation management.

CARE: ProChapsZ™ may be washed in a standard washing machine and dryer, using only cold or warm setting. Do not use hot setting. Do not use bleach or harsh detergents as they can damage the protective pads.

WARNING to USER

Elvex® ProChapsZ™ garments with Prolar™ protective pads are designed and Certified by Underwriters Laboratories in accordance with ASTM F-1414 and meets ASTM F-1897-2008. These garments provide limited protection and are designed to reduce the risk or severity of injury to the body parts covered by the protective pads should they come in contact with a rotating saw chain. The garment may not prevent penetration of a chain saw in some instances depending on the speed and sharpness of the chain, size and power of the chain saw, design of the chain saw brake and sprocket and the operator's technique and competence.

The Prolar™ chain saw protective pads used in these garments may not be patched or repaired, since the cut retarding properties may be severely reduced or eliminated. Once cut, the garment should be discarded, since the protective properties may have been compromised.

Elvex® ProChapsZ™ should be properly fitted and all garment fasteners must be used and snugly adjusted on the wearer. An unfastened or loosely fitted chap provides little or no protection. The protective garment must be worn at all times when using a chain saw.

Severe personal injury can result from contact with a rotating saw chain despite the use of Elvex® ProChapsZ™ garments. The garment is not intended to be a substitute for good chain saw operating procedures. Always follow all safety procedures described in your chainsaw owner's manual. Elvex® ProChapsZ™ garments are not intended to protect against any other power tools.

Failure to follow all of the above WARNINGS and instructions may result in severe personal injury including DEATH!
