

Instability Balls

for

MVP™ Balance System

for balance training and ROM

and

Multi-Axial Positioning System

for foot and ankle therapy and ROM

Screw instability ball into balance platform insets to create wobble or rocker board, or ROM exerciser.

WARNING

Exercise routines should be determined by your doctor, therapist, coach, or trainer.

MVP™ system offers an unstable and sensory-stimulating platform to facilitate balance and proprioceptive training and postural reactions. The boards can be used for: balance, coordination and proprioceptive training; ankle and knee strengthening and rehabilitation; core strengthening and stability; ankle range-of-motion and flexibility; and improved posture.

- use as wobble or rocker board
 - one ball for wobble board
 - two balls for rocker board
- level of difficulty is variable
- 5 color-coded instability balls
 - smallest ball (yellow) is most stable
 - largest ball (black) is most unstable
 - balls screw in/out of platform with ease
- three sizes of circular platforms
 - smaller is more difficult, larger is easier
- 2 side slots in platform for band or tubing
- use hanging rack for compact storage
 - holds 10 balls and up to 4 platforms

MVP™ balance system

all components of the clinic MVP set hang on wall for easy storage!

tie band or tubing in slots for dynamic exercise

complete MVP™ set

10-1904 complete set

set includes:

10 ball wall rack, 10 balls - 2 each level, 16" diameter board, 20" diameter board, 30" diameter board

additional platforms and balls

platforms

- 10-1776 16" diameter, hard
- 10-1786 20" diameter, medium
- 10-1796 30" diameter, easy
- 10-1696 20"x40" board

- circular boards have 3 ball-insets
- rectangular board has 5 ball-insets
- boards have slots to tie exercise band or tubing for a more dynamic vestibular challenge

2 ball sets

challenge	height	pair
yellow	x-easy 1"	10-1760-2
red	easy 1.5"	10-1761-2
green	moderate 2"	10-1762-2
blue	hard 2.5"	10-1763-2
black	x-hard 3"	10-1764-2

10 ball sets

wobble off-center

secure 2 balls to board for rocker board

Multi-Axial Platform System

Multi-Axial Platform System offers adjustable ROM and weight training to maximize lower body rehabilitation. Includes reversible board (1 side for left foot and one side for right foot) and 5-ball set (color-coded yellow, red, green, blue and black from least to most difficult). Balls screw into board to provide vestibular challenge. Comes standard with 2 weight rods, 10 pounds of disk weights and a wallrack. Optional motion limiter is used to limit ROM.

- Professional System** pictured above
- [a] two-sided professional Multi-Axial board
 - [b] weight rack with five color-coded instability balls: yellow, red, green, blue and black
 - [c] 2.5 lb. weight plates
 - [d] motion limiter complete with clips and padding
 - [e] weight rod (for any of the five sockets on either side of board)
