

Instructions:

1. Install **Wall Bracket (A)** 41-3/8" off finished floor using appropriate hardware (not included)
2. Install **Foot Pedal (C)** on **Floor Bracket (F)** using **2 Bolts (D)**, **Washers and Nuts (E)** provided.
3. Install **Single Hole Faucet (B)** on **Hand Sink (A)** and run water line from center of **Foot Pedal (C)** to **Single Hole Faucet (B)**.
4. Prepare water line feeds to hook up to **Foot Pedal (C)**.
5. Attach 1/2" to 3/8" NPT adapter (not included) to foot pedal.
6. Attach **Mixing Valve (I)** to 1/2" to 3/8" NPT adapter (not included)
7. Lift up complete sink unit and hang on **Wall Bracket (G)**. Make sure base is sitting on floor for proper installation.
8. Install drain with plumbers putty on top and rubber washer with locknut below. Make sure top of drain is below main bowl surface for proper drainage.
9. Hook up water and drain lines to complete installation.
