

Logitech® Wireless Wave Combo MK550

Comfort curves without the learning curve

With contoured curves in all the right places, this ergonomic keyboard and mouse give you the support you need to minimize hand and wrist strain—even after spending all day on your computer. More comfort also means you can type as you normally do using the standard keyboard layout you already know.

FEATURE AT A GLANCE

Ergonomic Wave keyboard

With its Constant Curve design, the keyboard guides hands and fingers into a natural typing position that feels just right.

* Keyboard battery life calculation based on estimated two million keystrokes/year in office environment. User experience may vary. Mouse battery life may vary based on user and computing conditions.

** The laser sensor does not work on glass or mirrors.

Cushioned palm rest

Helps position your hands comfortably and properly on the keyboard.

No battery changes for years

Long-lasting battery life—up to three years for the keyboard and two years for the mouse**.

Contoured laser mouse

Comfortable shape with rubber side grips gives you smooth, accurate cursor control on just about any surface*.

Plug-and-forget Unifying receiver

One tiny wireless receiver stays in your notebook and connects the keyboard and mouse—without the hassle of multiple USB receivers.
