2. Insert tapered end quickly into ear canal.

3. Correct fit.

4. Incorrect fit.

! WARNING

Use the laboratory derived attenuation data on PlugStation for comparison purposes only. The amount of protection afforded in field use often is significantly lower depending upon how the protectors are fitted and worn. Failure to follow all instructions could result in hearing loss or injury. Failure to obtain a proper fit will reduce effectiveness of hearing protectors and could result in hearing loss or injury. Earplugs must be used as part of an approved hearing protection program.

Over protection can be dangerous. The wearer must be able to hear warning signals. Wearers with hearing loss should exercise extreme caution. It is the employer's responsibility to ensure that the type of hearing protector and its NRR is appropriate for the user in their particular workplace. Failure to follow these warnings could result in serious injury or death.
