

Improve business efficiency • Improve employee workplace safety • Improve patient care & management

Door Hanger Bracket - #307001

Hanger bracket is sold in pairs for proper mounting. The hanger brackets are made from sturdy 18 gauge stainless steel. They can mount on any door that is 1.75" thick. The bracket extends down from the top of the door by 13". It can be used to hang virtually anything with two mounting holes. We provide (4) 1" squares of 3M Dual-lock with each pack. The 3M Duallock is a removable adhesive that can be used to further secure the mounted product to the door. This eliminates the product from banging into the door.

Bracket is intended to be used with all isolation stations, wall desks, wall storage cabinets and glove box holders.

Our Door Hanger Bracket provides an economical and effective way to better utilize space in your facility.
