

# OxyWrap<sub>2</sub>

A Revolutionary Wound Dressing from **ERGOMAT**

OxyWrap is a **unique new wound dressing** product that is ideal for bandaging workplace, recreation or home injuries.

- Latex and adhesive-free wrap with cross-elastic properties sticks to itself, but not to skin or hair
- Fast application!
- Easy to fix - even on body parts that are hard to dress and secure.
- Flexibility of the material allows a patient to maintain almost complete range of motion when joints are wrapped.
- Breathability of the material allows faster healing
- Works even in water or when sweating, keeps it's form. (will not "slide" )
- Will not shrink like other bandages.
- Can be placed directly on the wound with no need for additional dressings like cotton or gauze.

**OxyWrap: an indispensable product in every workplace clinic, field and home first aid kit!**

**Wall Mount Dispenser for Soft**

## OxyWrap – Soft (Natural or Blue):

Ideal for smaller wounds with less blood and liquid, particularly the fingers, toes, wrists & joints

## OxyWrap – X-Treme (white):

Unparalleled for emergency first aid for larger wounds and for pre-treating injuries that may require an Emergency Room visit.

**Latex Free! FDA Approved**

A Revolutionary Wound Dressing from ERGOMAT

<b>Adhesive-Free Bandage</b>	Does not stick to wounds, skin or hair	No glue residue left-behind
<b>Only Sticks To Itself</b>	Can be used together with ointments & Soft creams with no need for additional clips, pins or tape	Not necessary to clean the skin for dirt or grease before applying (only the wound must be clean)
<b>Soft &amp; Elastic</b>	Lightweight properties make it extremely comfortable, and forms easily with joint movement	Fits under gloves
<b>Porous Material</b>	Allows the wound and skin to breathe and does not leave "white" or "puckered" skin under the bandage	Breathability promotes smaller scabs & faster healing
<b>Highly Absorbent</b>	Wicks away blood and liquids from the wound	Ideal for bleeding wounds
<b>Stops the Bleeding</b>	Applying several layers and tightening the bandage stops the bleeding	Stops bleeding, closes the wound, producing less chance for infection
<b>Adheres in Water</b>	Will not fall off, even when wet, and will not shrink	Protects the wound at all times
<b>OxyWrap – (Blue)</b>	Highly visible	Great for the food processing industry – the blue color makes it easy to detect
<b>OxyWrap - X-treme</b>	Thicker and stronger than OxyWrap – Soft	May be used to create a non-slip support bandage, as a pressure element or as an absorbent gauze
