General information

Together with filters/cartridges from the Sundström filter range in accordance with the NIOSH approval label. Three sizes S/M, M/L and L/XL.

Together with compressed air attachment SR 307 and SR 358 or SR 359 accordance with NIOSH approval label.

When selecting equipment for SR 100 some of the factors that should be taken into account are as follows:

- Type of pollutants •
- Concentrations ٠
- Work intensity •
- Protection requirements in addition to respiratory protective advice. •

Risk assessment should be carried by a person who has suitable training and experience in the area.

Instructions for use for SR 100 should be read before use.

Unpacking SR 100 Packing list

Check that the equipment is complete in accordance with the packing list, and that no transport damages have occurred.

Packing list:

- Half mask
- Pre-filter holder
- Pre-filter
- Cleaning tissue
- User instruction
- Approval Label

Combination filters

During work in atmospheres containing both particulates and gases/vapors (such as spray painting) the particulate filter and chemical cartridge should be combined.

Press the filter/cartridge together so that the arrows on the particulate filter point towards the chemical cartridge.

HI-SR 100 USA

Pre-filter

Pre-filter prevents premature clogging of the main filter. The pre-filter holder prevents damage to the main filter.

N.B. The pre-filter is a pre-filter only, and cannot be used as a substitute for particulate filter P100.

To fit the filter in a mask

Check that you have selected the correct filter type.

Fit the filter/combined filter in the mask so that the arrows on the filter points towards the user's face.

Carefully check that the edge of the filter is in the internal groove of the filter mounting all round.

HI-SR 100 USA

Fit pre-filter SR 221 in the pre-filter holder and press it into place on the filter.

Fitting

Adjust the head harness so that the mask fits snugly and comfortably. It is important that the bands are placed according to the picture. Any other method will result in inadequate seal and less comfort.

Place the palm of your hand lightly over the hole on the pre-filter holder.

2010-03-17 /PA 02 2014-03-27 /PA 6 of 10

HI-SR 100 USA

Breathe in deeply and hold your breath. If the seal is good, the mask will press against your face. Inadequate fit may be caused by beard growth, stubble, deep facial furrows or unusual face size.

Leakage may also occur if the exhalation membranes are soiled or defective.

Cleaning Daily maintenance

Remove the filter and the membranes. Clean the mask with the Sundström antibacterial cleaning tissue SR 5226.

Check and replace worn or damaged parts. Pay special attention to the exhalation membranes. Making sure that they are clean and intact is as important as regular filter replacement.

Manual cleaning

Remove the filter and membranes.

2010-03-17 /PA 02 2014-03-27 /PA 8 of 10

HI-SR 100 USA

Use soft brush and clean with soapy water. Rinse and air dry.

Warning! Never use solvents for cleaning.

Storage

The best way to store the mask, clean and dry is in the Sundström storage box SR 230 or storage bag SR 339.
