TROUBLE SHOOTING TIPS

If fan will not start, check the following:
+ fuses and circuit breakers
+ wiring connection to fan
+ wiring connection in fan

If fan sounds noisy, check the following:
+ all casting screws are securely fastened
+ all blade screws are securely fastened
+ control style: solid state controls can cause an A/C hum at low speeds

If fan wobbles, check the following:
+ all blades are securely fastened to motor
+ all blades are an even distance from ceiling
+ upper canopy is not touching ceiling (leave 1/8 gap from finished ceilings)
+ J-Hook is secure
